Tumours And Homeopathy

Cancer patients who use homeopathy and alternative therapies as part of their cancer treatment are, on average, twice as likely to die from the disease as those who use conventional therapies. Homeopathy is a holistic approach to health care that emphasizes individualized treatment based on the patient's unique symptoms, rather than just treating the disease itself. It is a widely accepted practice worldwide and has been studied extensively in scientific research.

Bone Tumor: Treatment, Types, Tests & Homeopathic Treatment

Bone tumor is a lump or mass of tissue that forms when cells divide uncontrollably. These cells are called osteoblasts, which produce bone tissue. There are several types of bone tumors, including osteosarcoma, chondrosarcoma, Ewing's sarcoma, and osteoid osteoma. Each type of bone tumor has different symptoms and requires specific treatment.
